

# Ship-from-Store

Turn your stores into mini fulfilment centers

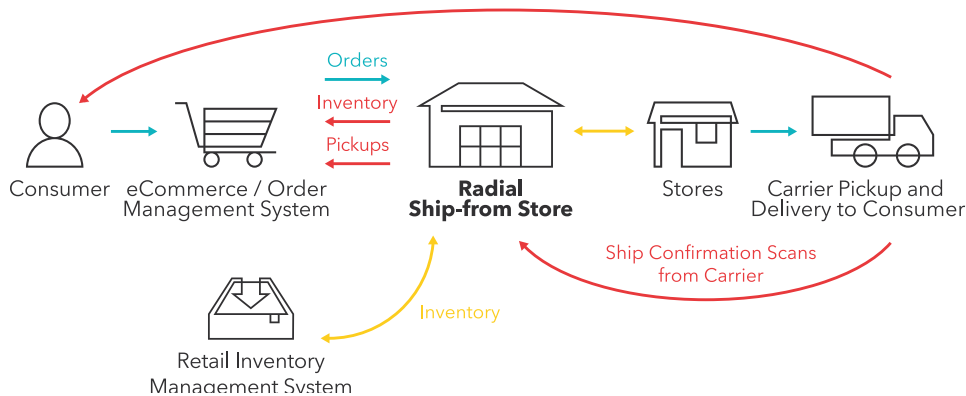

Radial Ship-from-Store is a cloud-based modular solution in our Radial Order Management suite. Ship-from-Store connects your store and ecommerce channels by exposing store inventory online and enabling your store staff to seamlessly fulfill web-based orders.

Ship-from-Store delivers a distinct competitive advantage for you to turn your stores into mini fulfilment centres and save online sales that may otherwise be lost due to out-of-stocks. The solution is fully integrated with our Radial Order Management system, or it can be deployed as a stand-alone module with any third-party or in-house order management solution.

## Features:

- Integrates with any order management system
- Intelligent order routing based on your defined criteria
- Optimised pick list and customized packing slips and shipping labels
- Intuitive user interface
- Mobile pick, pack and ship add-on solution
- Automated carrier integration
- Automated inventory updates
- Order re-allocation for unpicked items
- Comprehensive reporting
- Pre-Integrated with a suite of national and international carriers

## How it Works

## Benefits:

- Increases your ecommerce revenue by 20% or more
- Mitigates out-of-stock situations
- Increases your margins by 30% on end-of-season merchandise
- Minimises markdowns
- Improves inventory turns
- Captures true item demand
- Decreases shipping time and expense for international orders
- Expands your online product assortment
- Optimises your in-store inventory
- Improves customer loyalty

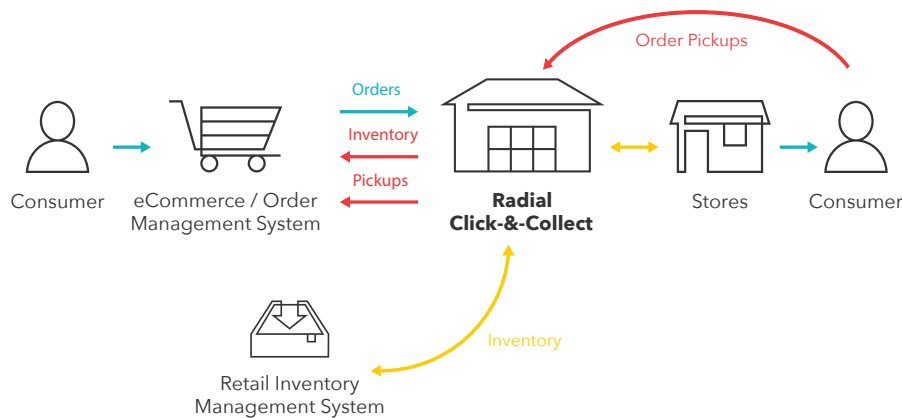

# Click & Collect

Streamline your Omnichannel Advantage

Radial Click-&Collect is a cloud-based modular solution in our Omnichannel Technology suite. Click-&Collect helps you enhance operations and increase sales by exposing brick and mortar store inventory for ecommerce sales and enabling your store staff to seamlessly fulfill orders from your customers selected store locations.

Click-&Collect enables buy anywhere, pickup in-store convenience to provide your customers with a fast and easy fulfilment option to “commit” the store sale while your customer is online. Our solution is fully integrated with our Radial Order Management system, or it can be deployed as a standalone module with any third-party order management solution.

## How it Works

## Features:

- Integrates with any order management system
- Intuitive, user-friendly interface
- Comprehensive reporting
- In-store notifications and alerts
- Automated inventory updates
- Configurable pick lists and hold tickets
- Staging location support
- In-store order lookup and modification

## Benefits:

- Improves customer loyalty
- Delivers convenience and choice for your customers
- Optimises your in-store inventory
- Increases foot traffic in your stores
- Enables cross-sell opportunities in your stores
- Eliminates shipping charges for your customers

# Ship-to-Store

## Simplified In-Store eCommerce Fulfilment

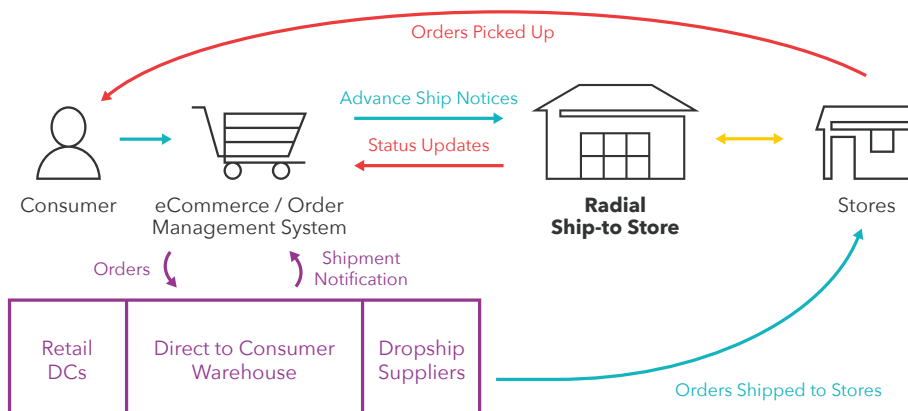

Radial Ship-to-Store is a cloud-based modular solution in our Omnichannel Technology suite. Ship-to-Store offers your customers a convenient store-based collection for online-only merchandise or merchandise currently out-of-stock in one of your stores. Ship-to-Store enables your retail associates to receive and stage deliveries and support your customer collection interactions.

Ship-to-Store drives in-store traffic and increases your potential for incremental in-store purchases and upsell opportunities, while providing a flexible and free or discounted shipping option that enhances your customer's shopping experience. Our solution is fully integrated with our Radial Order Management system, or it can be deployed as a stand-alone module with any third-party or in-house order management solution.

### Features:

- Integrates with any order management system
- Delivers and intuitive, user-friendly interface
- Provides advanced shipping notification to stores
- Supports split shipment orders
- Delivers configurable hold tickets
- Provides staging location support
- Enables in-store order lookup and modification functions
- Facilitates in-store processes for merchandise receipt & customer pickup
- Sends order pickup notifications to OMS
- Pre-Integrated with a suite of national and international carriers

### How it Works

### Benefits:

- Increases your foot traffic in-store
- Eliminates or reduces shipping fees for your customers
- Provides you with upsell opportunities in-store
- Makes your entire online assortment available for in-store pickup
- Expands delivery options and convenience for your customers
- Improves your inventory turns
- Improves customer loyalty
